

What Can TrueKast Do for Your Clinic?

AMPUTATION PREVENTION

Patients treated with TCC have fewer amputations and high healing rates.

FASTER PATIENT PASS THROUGH

TrueKast can be removed, applied, and walked on in less than 20 minutes.

SAFER WAY TO CAST

TrueKast's Patent Pending Technology helps to reduce the risks of injury from secondary ulcerations, patient ambulation, and removal of the cast.

GREATER PATIENT ACCEPTANCE

TrueKast's light-weight, comfortable design is acceptable to most patients.

LCD COMPLIANCE

Total Contact Casting provides the Offloading necessary for the Good Wound Care standards of the LCDs for Hyperbarics and Skin Substitutes.
